

Green Genesis

AFRICA LTD

COMPANY PROFILE

ABOUT US

Green Genesis Africa Limited is a growing agribusiness company based in Tanzania, engaged in agricultural production, trading, and supply for both domestic and export markets. The company manages approximately 150 hectares of farmland located in Tabora and Urambo, primarily dedicated to tobacco production, alongside maize, avocado, and livestock value chains.

In addition to own-farm production, the company operates a strong aggregation and sourcing network across multiple regions of Tanzania:

- Maize is sourced from Songwe, Songea, and Rukwa Regions
- Avocado is sourced from Njombe, Mbeya, Kagera (Ngara), and Songwe Regions, including Hass, Fuerte, and local varieties for oil processing
- Livestock (cattle, goats, and sheep) is sourced from Manyara, Arusha, and Shinyanga Regions

Green Genesis Africa Limited focuses on commercial-scale operations, quality assurance, and efficient supply chain management to serve both domestic and export markets. The company emphasizes value addition, export market expansion, and strategic partnerships to enhance profitability and reduce operational risks.

COMPANY HISTORY

GREEN GENESIS AFRICA LIMITED is a dynamic and multifaceted enterprise committed to excellence in wholesale agricultural products, live animals, food and beverage distribution, tobacco trading, real estate, and logistics services. Based in Africa, our company is dedicated to contributing to the economic growth and development of the regions we serve while upholding the highest standards of quality and service.

Domiciled in Dar es salaam, Tanzania Green Genesis Africa Ltd is an organization dedicated to sustainable development across Africa, with a focus on environmental conservation, renewable energy, and sustainable agriculture. Founded to tackle critical environmental challenges, the company strives to promote eco-friendly practices that balance economic growth with ecological health.

The company's core areas include clean energy solutions, sustainable farming practices, waste management, and reforestation projects. Green Genesis Africa Ltd collaborates with government entities, the private sector, and local communities to design and implement projects that help reduce environmental impact, restore biodiversity, and support green job creation.

(Flue-Cured Virginia & Air-Cured Tobacco)

- Maize Production and Supply
- Livestock Farming and Trading
- Avocado Production and Supply
(Hass, Fuerte and Local Varieties for Oil Processing)

QUALITY ASSURANCE

STRICT STANDARDS

Green Genesis Africa Limited applies strict quality standards in all its operations to ensure that products meet required specifications for domestic and international markets. These standards cover farming practices, harvesting, handling, storage, and transportation to maintain product quality and safety.

REGULAR AUDITS

The company conducts regular internal audits and field inspections to monitor compliance with established quality procedures, good agricultural practices, and regulatory requirements. These audits help identify gaps, ensure continuous improvement, and maintain consistency in product quality.

TRACEABILITY AND DOCUMENTATION

Green Genesis Africa Limited maintains proper documentation and traceability systems to track products from production to final delivery. This ensures transparency, accountability, and reliability for buyers and regulators.

COMPLIANCE WITH REGULATIONS

All products are produced and supplied in accordance with relevant national and international regulations. The company works closely with regulatory authorities to ensure full compliance with quality, safety, and licensing requirements.

SUSTAINABLE FARMING

ECO PRACTICES

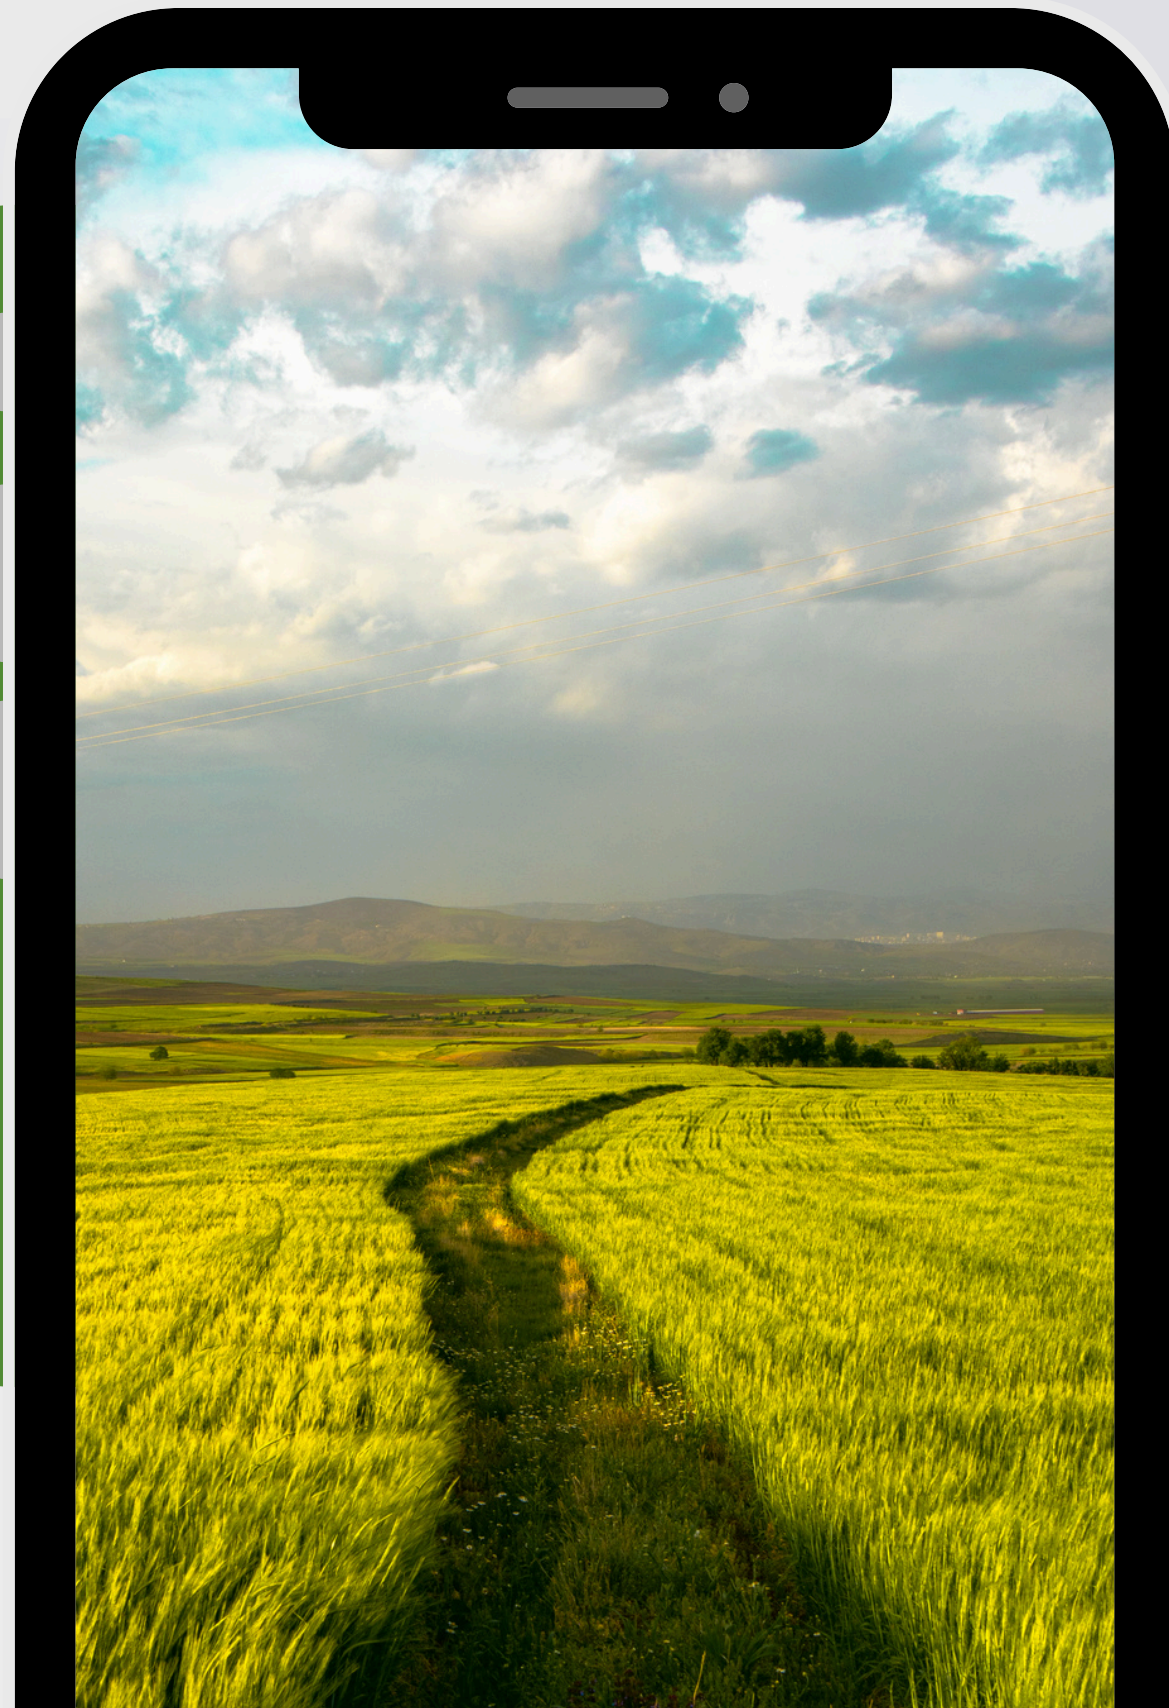

Green Genesis Africa Limited implements environmentally friendly practices to minimize the impact of farming on ecosystems. This includes using organic fertilizers, reducing chemical inputs, protecting biodiversity, and maintaining natural habitats around farm areas to support sustainable agriculture.

WATER CONSERVATION

. The company employs water-saving techniques such as drip irrigation, rainwater harvesting, and efficient irrigation scheduling. These measures ensure optimal water usage, reduce wastage, and support sustainable crop production even in areas with limited water resources.

SOIL HEALTH

Green Genesis Africa Limited prioritizes soil health through crop rotation, cover cropping, organic composting, and minimal tillage practices. Healthy soils enhance fertility, reduce erosion, improve water retention, and increase long-term farm productivity.

MARKET PRESENCE

Green Genesis Africa Limited has a strong market presence in both domestic and international markets. The company supplies high-quality products including tobacco, maize, avocado, and livestock to various local buyers, distributors, and processors.

In addition, the company is actively developing its export market, ensuring compliance with international standards and establishing reliable trade partnerships. Our growing market reach reflects our commitment to quality, consistency, and customer satisfaction..

CLIENTELE BASE

FARMERS GROUPS

Green Genesis Africa Limited collaborates with various farmers' groups and cooperatives to promote sustainable agriculture, knowledge sharing, and collective production. These partnerships enable smallholder farmers to access inputs, technical guidance, and markets, improving productivity, income, and community development.

FOOD PROCESSORS

The company partners with food processing companies to supply high-quality raw materials such as maize, avocado, and livestock products. These partnerships ensure that products are processed efficiently, meet quality standards, and reach both domestic and international markets.

INNOVATION FOCUS

Green Genesis Africa Limited is committed to fostering innovation across all its operations. The company continuously explores and implements new farming techniques, crop varieties, and processing methods to improve productivity, quality, and efficiency.

Innovation initiatives include:

- **Adoption of modern agricultural practices and technology to optimize crop yields**
- **Development of value-added products for domestic and export markets**
- **Implementation of sustainable and eco-friendly production methods**
- **Research and development to introduce improved crop varieties and better livestock management**

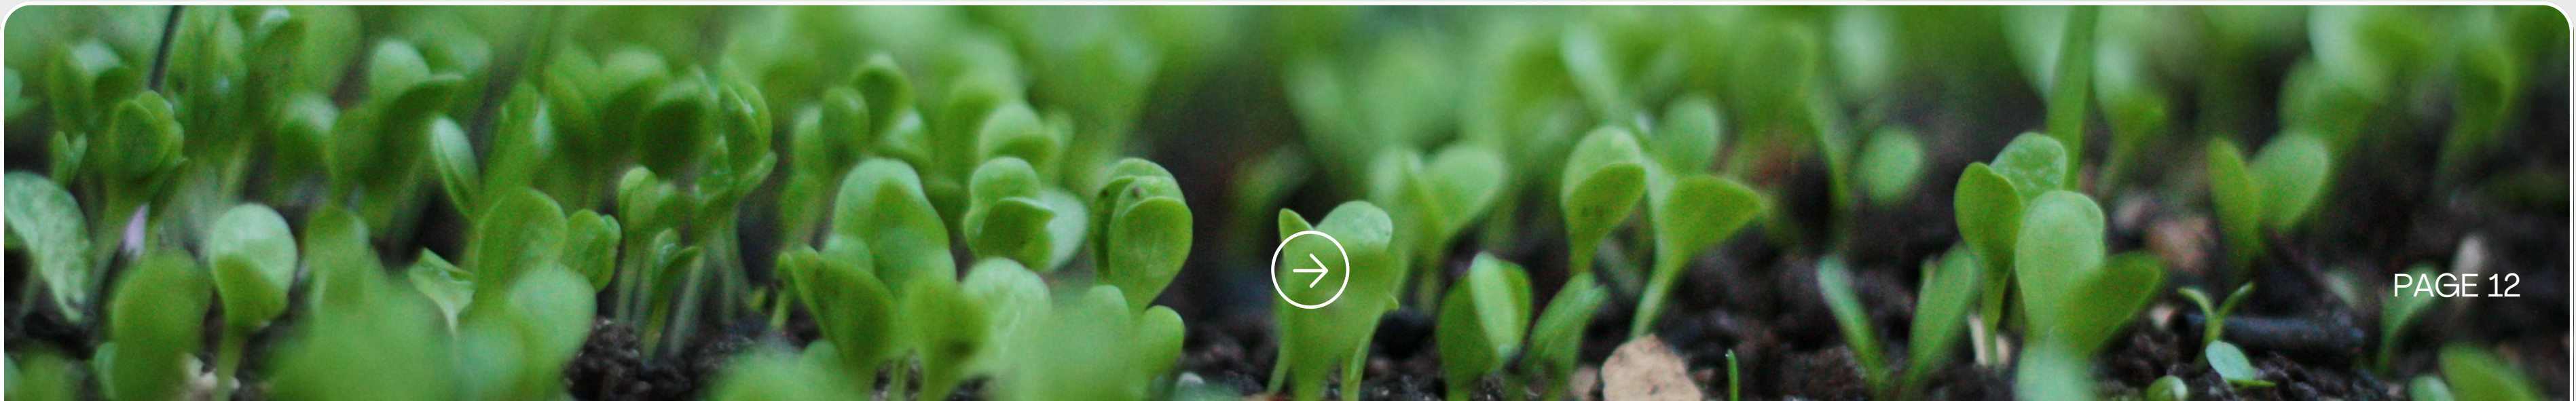

Through innovation, the company ensures it stays competitive, responsive to market needs, and aligned with global best practices.

GROWTH STRATEGY

Green Genesis Africa Limited has a clear and sustainable growth strategy focused on expanding production capacity, market reach, and value addition. The key elements of our growth strategy include:

- **Market Expansion:** Strengthening presence in domestic markets and entering new export markets to diversify revenue streams.
- **Product Diversification:** Introducing new crop varieties and value-added products such as processed tobacco, avocado oil, and packaged maize.
- **Technology Adoption:** Implementing modern farming techniques, mechanization, and digital solutions to increase efficiency and yield.
- **Strategic Partnerships:** Collaborating with farmers' groups, food processors, distributors, and export partners to ensure steady supply chains and market access.
- **Sustainability Practices:** Maintaining environmentally sustainable farming to ensure long-term productivity and compliance with international standards.

This strategy ensures that the company grows in a structured, efficient, and sustainable manner, delivering value to stakeholders and strengthening its market position.

FINANCIAL STRENGTH

Green Genesis Africa Limited demonstrates strong financial stability and operational capacity to support its agricultural and trading activities. The company maintains sound financial management practices, ensuring efficient allocation of resources, timely payments, and sustainable investments in production, processing, and market expansion.

Our financial strength allows us to:

- Invest in modern farming technology and equipment
- Expand production capacity and diversify products
- Maintain reliable supply chains and timely delivery to clients
- Enter and sustain a presence in domestic and international markets

Through prudent financial planning and management, the company is well-positioned to achieve long-term growth, stability, and profitability.

LEGAL DOCUMENT

Green Genesis Africa Limited conducts all its operations in full compliance with applicable laws and regulations in Tanzania. The company holds all the necessary legal documents that verify its legitimacy in agricultural production, trading, and business operations, including:
